

Product code:

# POLAR HV WINTER JACKET

Introducing the POLAR HV WINTER JACKET, a heavy-duty insulated work jacket designed to provide maximum warmth, waterproof protection, and high visibility in demanding marine, offshore, and industrial environments. Engineered for harsh winter conditions, this professional jacket delivers reliable comfort and protection during cold-weather operations onboard vessels, in shipyards, and across dockside facilities.

Manufactured from durable Oxford polyester fabric with PU Milky membrane technology, the POLAR HV WINTER JACKET offers excellent windproof and waterproof performance while maintaining wearer comfort. The thick polyester insulation and soft fleece lining provide outstanding thermal retention, helping crews stay warm during prolonged exposure to cold temperatures and severe weather conditions.

Certified reflective segmented striping improves visibility during low-light and night-time marine operations, while the detachable adjustable hood and windproof front closure enhance protection against rain, wind, and sea spray. Raglan sleeves and elastic inner cuffs improve mobility and comfort without restricting movement during active work.

Designed with practical storage solutions, the jacket features multiple spacious zippered pockets for tools and personal items. An internal zipper opening allows easy logo embroidery on the outer shell, making the jacket suitable for professional company branding.

**Origin** - Designed for professional marine and industrial use

Product code:

# POLAR HV WINTER JACKET

## FEATURES

### **Waterproof & Windproof Protection**

PU membrane fabric protects against rain, wind, and harsh outdoor marine conditions.

### **Superior Thermal Insulation**

Thick polyester padding and fleece lining provide exceptional warmth in cold environments.

### **High-Visibility Safety**

Segmented reflective striping improves visibility during low-light operations.

### **Ergonomic Comfort**

Raglan sleeves and elastic cuffs ensure unrestricted movement and comfort.

### **Functional Storage**

Multiple spacious zippered pockets provide secure storage for essential items.

### **Custom Branding Access**

Internal zipper opening allows easy embroidery application on the outer fabric layer.

## TECHNICAL SPECIFICATIONS

Outer Fabric: 100% Polyester Oxford + PU Milky Membrane

Fabric Weight: 190 g/m<sup>2</sup>

Thermal Insulation: 100% Polyester 200 g/m<sup>2</sup>

Lining: 100% Polyester Fleece 200 g/m<sup>2</sup>

Waterproof & windproof construction

Reflective segmented striping

Detachable adjustable hood

Windproof front zipper closure with storm flap

Raglan sleeves

Elastic inner cuffs

3 spacious zippered pockets

Internal access zipper for logo embroidery

Heat-retaining construction

Colour: Yellow/Navy

### **CE**

Conforms to EN ISO 13688

### **Recommended Applications**

Marine & Offshore Operations

Shipyards & Port Services

Dockside Logistics

Offshore Maintenance

Outdoor Industrial Work

Winter Operations
